

Maps for Evaluating Benefits to Disadvantaged Communities

ZIP codes from top 25% CalEnviroScreen 2.0 census tracts

Released: November 3, 2014

For use for Fiscal Years 2013-14 and 2014-15 GGRF investments

These maps can be used to geographically evaluate whether projects are located in or provide benefits to disadvantaged communities. For more information on how these maps apply to disadvantaged community benefits please see Appendix A of the Interim Guidance for Investments to Benefit Disadvantaged Communities.¹

ZIP CODE ZONES

Projects may be considered to benefit disadvantaged communities if –

- **Located Within:** The project is located in the census tract and it meets the criteria provided in Appendix A of Interim Guidance for “Step 1 – Located Within;” **OR**
- **Provides Benefits To:** The project is located in a ZIP code that contains a census tract and it meets at least one of the following criteria provided in Appendix A of Interim Guidance for “Step 2 - “Provides Benefits To.”

The following project types have criteria based on ZIP codes containing disadvantaged communities:

| Project Type | References for Criteria Based on ZIP Codes (see Appendix A of Interim Guidance for full criteria) |
|---------------------------|--|
| Low Carbon Transportation | Table A-1: Steps 2.A., 2.C. |
| Transit Projects | Table A-2: Steps 2.C., 2.D. |

Map Legend

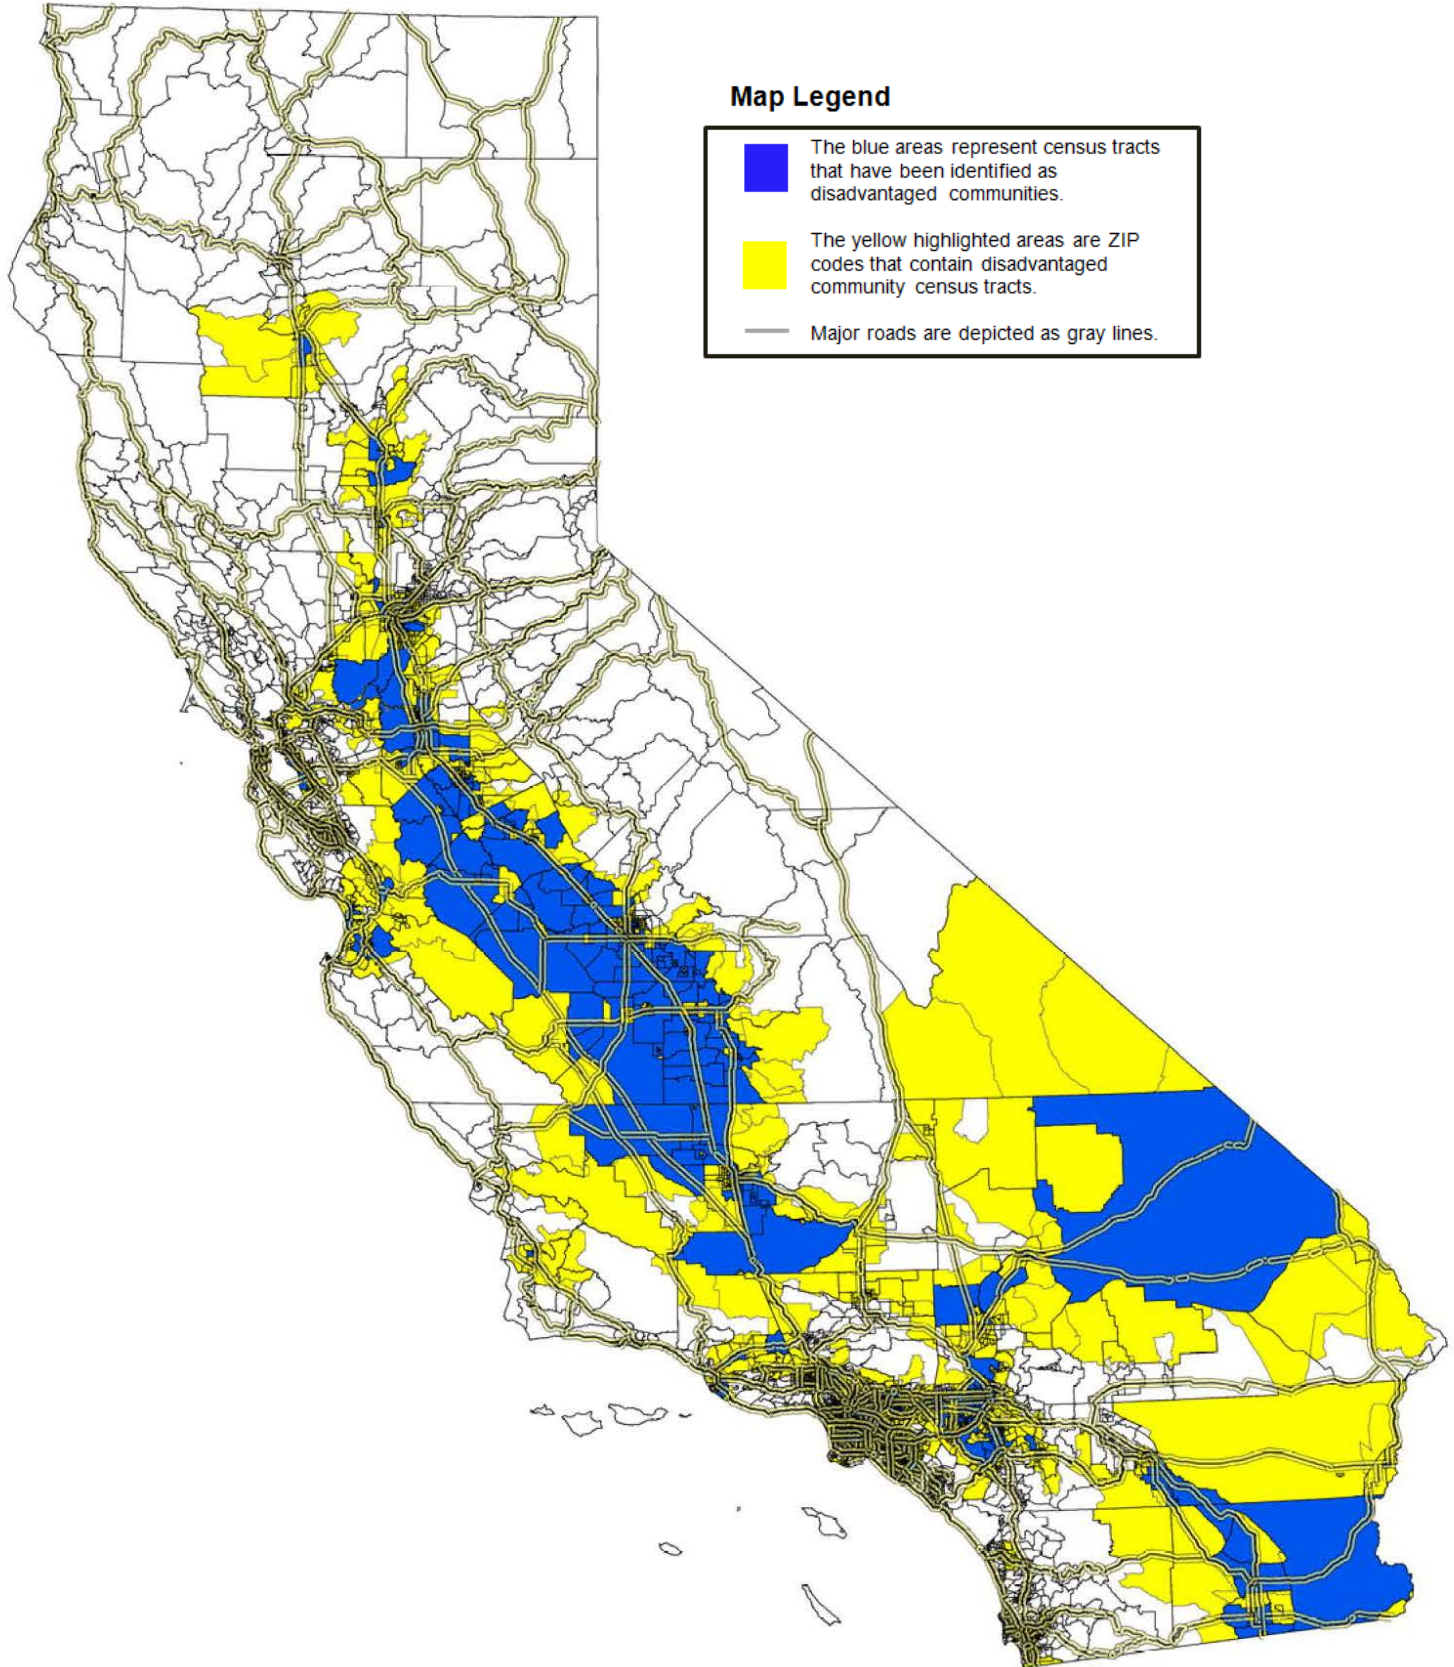

| | |
|---|--|
|  | The blue areas represent census tracts that have been identified as disadvantaged communities. |
|  | The yellow highlighted areas are ZIP codes that contain disadvantaged community census tracts. |
|  | Major roads are depicted as gray lines. |
